

Benoit Marcoux

Opal-RT Technologies, Canada

Mr. Marcoux obtained his bachelor degree in engineering in 1994 from the Ecole Polytechnique de Montréal specializing in power systems. His past experience includes 14 years in Hydro-Quebec doing various R&D work related to the power system simulation department. His experience in this field has led him to perform many power system studies on a wide range of topics. Benoit now works for OPAL-RT Technologies and is responsible for Asia Pacific where his rich experience in the field of real-time power system simulation is used daily.
