

**Amelie Wulff**  
**Global Sales Leader Hybrid Solutions – GE Renewable Energy**

Amelie Wulff is the Global Sales Leader Hybrid Solutions for GE Renewable Energy based out of the global headquarters in Paris, France. In her role, Amelie is driving the commercialization and marketing of GE’s Renewables hybrid business across the globe. She is overlooking a portfolio of multi-use technologies and generation assets and is seeking to drive new markets and business models across the globe to help GE’s customers move through the energy transition and towards higher renewable generation penetration.

Prior to joining Amelie spent 2 years as the Managing Director – Project Finance – for the International Markets at Current, powered by GE. Current, powered by GE, is activating and leading the transition to a 21st century ecosystem by helping companies redefine the way they use energy and data technologies.

Before her move to Current, she spent 10 years at GE Capital working in a number of GE businesses across Europe. She began her career in 2003 at Industrie-und Kreditbank in Germany working in the Structured Finance department covering the international offices of IKB from the risk side. In 2006, Amelie joined GE Capital in the Central European division of Healthcare Finance. From 2011 through 2015 she worked on GE’s Corporate Leadership Staff and from 2014 to 2016, Amelie spearheaded all commercial and business development activities for GE Capital International in EMEA in the Healthcare Finance unit based out of London.

Amelie holds an M.B.A. University of Utrecht and a B.A. in Economics from Boston College.

Amelie is on the board of the Evangelische Krankenhaus Duesseldorf and an advisor to both a medical device and an IT start-up based out of Germany.
