

**Luigi Lonoce,
Global Product Specialist Rail and Urban
Transportation, ABB Ltd, Power Grids**

Luigi holds a M.Sc. in Electronic Engineering and a PgCert in Railway Systems Engineering and Integration. He has been with ABB since 2008 and has held several leading technical roles in the system integration business around the globe. As part of the

Global Product Management team of ABB Power Grids, he is currently responsible for the technical solutions portfolio for rail and urban transport electrification, including the innovative flash-charging technology for high-capacity battery-powered vehicles. His passion is to apply technologies to a more sustainable mobility that meets people's needs and matches local contexts.
