

Paul Guy

Dynamic Ratings

Paul Guy, South-East Asia Director for Wilson Transformers and Dynamic Ratings, based in Singapore. Originally from New Zealand, qualified in Electrical Engineering (Industrial Electronics and Control Systems) with a Master's in Business Administration (MBA) from University of Canterbury. Currently studying (with a long-term view) for his Doctor in Business Administration (DBA). Paul has extensive Senior Management work experience with multinational corporates such as ABB and Areva/Alstom Grid in Australia and New Zealand, South East Asia countries, England, USA, Europe, Kazakhstan, and Middle East, with diverse experience from Manufacturing, Sales & Marketing and Service in High Voltage Electrical (generation, transmission, and distribution); Industrial, Commercial, Electrical Consumer Product Manufacturing; and the IT Telecommunications industry. Currently an active Working Group member of CIGRE A2.55 expert community covering Transformer Life Extension best practise. He is also the Event Organiser for TechCon SEA Conferences and Exhibitions.

Additional to the above, Paul shares a passion for optimising Smart Grid Asset Management practices - maximizing asset ROI, asset life extension, and reducing total-cost-of-ownership – through best practise strategy; accurate, timely and valid data collection and analytics; visualisation; and operational excellence.
