

## Tutor's Experience Reference

Ing. Tobias Neier, MBA

Born in 1981 in Austria, Austrian nationality, Technical advisor in BAUR GmbH, Author of cable diagnostic handbooks, operator guidelines, Seminar Tutor for Sales Meetings, Operator Seminars, Presentations and board discussions in leading Power Utilities as well as operator trainings. Educational Seminar Tutor for IEEE on VLF Testing and Diagnosis for Distribution Cables. Speaker in International Conferences CableTech2010 and 2013 in India, CIRET T&D Asset Management Conference Malaysia with focus on Cable Diagnostic technology and field experience, CMD 2012, IIEE2012, Cabletech and EDC SEA 2014, IEEE PES 2019, CIRET 2019, Jicable 2019.

### Field of expertise and experience:

- Cable Fault Location in underground cable networks
- High Voltage Testing and Diagnosis of underground cables
- Insulation Oil Testing technology
- 

Practical field trainings as well as several months of field trials in more than 30 countries around the world requested the understanding of various different design and layouts of underground cable networks in the range from low voltage, medium voltage and high voltage.

With working experience since 2002 with Company BAUR GmbH and managing the Asia Market for several years, direct contact with operators as well as leading managers in Power Utilities and Research Institutes enabled to gain and provide latest experience worldwide. Intensive Consultancy work on Cable Diagnostic strategies have intensified the knowledge on cable maintenance strategies.
