

Christian Dumbs

ENEDIS, France

Christian has been working in the field of renewable power system for more than 20 years.

He started his industrial career with EDF, where he occupied several positions in the field of renewables and their interaction with the power system. He then moved to the solar equipment manufacturer Schott

Solar as business development director for the French and North African markets.

Christian returned to EDF in 2013 where he was in charge of a major national smartgrid project aiming at the grid integration of distributed PV-battery systems for enhanced power system regulation.

Christian joined Enedis in 2016 as a coordinator of the InterFlex project.

Christian graduated from Ecole Centrale Paris/France and RWTH Aachen University/Germany and holds a PhD in power systems engineering from Ecole des Mines Paris.
